INNOVATION SINCE 1877

From our home in Norway, Helly Hansen has been making professional grade gear that helps people stay and feel alive for the last 140 years.

In 1877, after many years at sea, Norwegian captain Helly Juell Hansen and his wife, Maren Margarethe, began producing oilskin jackets, trousers, sou'westers and tarpaulins, made from coarse linen soaked in linseed oil. Since then, the legacy of Helly Hansen lives on, developing and creating a long list of first-to-market innovations.

To this day, we continue to make gear that is trusted by professionals around the world. Helly Hansen apparel is developed through the insights of the 55,000 professionals living and working in the world's harshest environments and can be seen on ski patrollers, mountain professionals, world-class sailors, skiers and adventurers.

Helly J. Hansen's

MOSS

1949

HELOX - THE NEXT EVOLUTION IN WATERPROOF

Helox waterproof fabric featured a thin sheet of translucent PVC plastic that was sewn into coats to make them waterproof. It was a revolutionary technology that became the must-have protection for outdoor use. With a production of 30,000 coats each month, the success was almost immediate and was used by the Norwegian delegation at the 1952 Olympic Games in Helsinki.

1961

FIBERPILE - THE TECHNICAL MIDLAYER IS INVENTED

Helly Hansen partnered with Norwegian Fiber Pile Inc. and developed the original Fiberpile – the first fleece. It featured a high warmth to weight ration and maintained its thermal qualities even when wet, making it a favorite of lumberjacks and outdoor enthusiasts. The concept lives on and the modern version of ProPile is still in production today.

1970

LIFA® - THE BIRTH OF TECHNICAL BASE LAYER

HH's LIFA® revolutionized the industry with the introduction of the first technical base layers. LIFA® moves moisture away from the body allowing users to stay warm and comfortable. It has been used by professionals on every ocean, many of the world's tallest peaks and was included in Outside Magazine's list of The Most Influential Gear of All Time in 2012. LIFA® remains the cornerstone of what we believe is the best technical base layer available today.

1984

HELLY TECH® - THE WATERPROOF AND BREATHABLE SOLUTION

Helly Tech® waterproof and breathable fabric was launched in the 1980's, winning awards and setting the new standard for performance and protection. It also provided the final layer for the 1986 introduction of the Helly Hansen 3-Layer System™, an industry-first program educating people on how to dress for the outdoors. Today, Helly Tech® fabrics are engineered to deliver the specific demands of professional's skiers, sailors, and at workplaces around the world.

1990

PROWOOL - THE PERFECT BLEND OF LIFA® AND MERINO

The Prowool (renamed HH® Lifa Merino) baselayer for cold weather conditions was launched in the late 90's, combining Lifa® Stay-Dry Technology™ with Merino wool for both moisture transport and added warmth. Designed for professionals facing the coldest conditions it quickly became the go-to piece for performance, warmth and comfort in extreme environments.

2012

H²FLOW™ - A BETTER SOLUTION FOR TEMPERATURE REGULATION

Helly Hansen introduced the new H2 Flow™ Technology in 2012 with the H2 Flow™ Jacket, which won an Award for Design Excellence from the Norwegian Design Council. The patented H2 Flow™ Jacket features an airflow venting system and a protective barrier. It allows adventurers to efficiently regulate their body temperature.

2018

LIFALOFT™

With increased warmth, lightweight insulation and superior moisture management properties, LIFALOFT™ technology is an insulation revolution that will keep you warmer with less weight and bulk compared to standard polyester insulation. Developed in cooperation with PrimaLoft®, LIFALOFT™ is a combination of LIFA®'s unique insulation structure and PrimaLoft®'s extensive knowledge in synthetic insulation

2020

LIFA® INFINITY PRO™ TECHNOLOGY

The next level of sustainable waterproof performance

FOR THE PEOPLE

The textile and garment industry is made up of a complex supply chain stretched all over the globe. It covers industries such as chemical suppliers, garment manufacturers and cotton crops often situated in countries with weak social regulations.

Helly Hansen has been a member of the Norwegian Ethical Trade organization since 2003 and their main support goes to helping us map our supply chain and engage in projects which improve people's rights and fair payment. Additionally, we have a close relationship with a majority of our Tier 1 and Tier 2 suppliers. Cooperation based on trust and mutual respect has been a part of our core values since the founding of Helly Hansen in 1877. Moreover, our manufacturing code of conduct, which is communicated and signed by all our Tier 1 and Tier 2 suppliers, is based on key UN and International Labor Organization conventions and documents.

We perform social audits on a yearly basis with all our Tier 1 suppliers, including approved sub-contractors. However, to achieve economic and social progress, our main focus is on social dialogue projects. Social dialogue is an integral aspect of achieving workplace harmony, leading to a better organization and greater productivity.

WE SUMMARIZE OUR FOCUS FOR THE PEOPLE IN FOUR MAIN AREAS:

1. Building long-term relationships based on trust and mutual respect.
2. Manufacturing code of conduct communicated and signed by all Tier 1 suppliers, including sub-contractors.
3. Yearly social audits.
4. Enabling "social dialogue" in the workplace to strengthen workers' rights as well as performance and productivity.

SUSTAINABILITY & RESPONSIBILITY

Helly Hansen strongly believes that long term commercial success can only be achieved by respecting, protecting and promoting ethical values, human rights, labor rights and the environment. We continuously work to improve our policies and practices, enabling us and our suppliers to achieve the highest standard in terms of social and environmental values.

We drive improvement for people, and for the planet, working towards making a positive impact on the lives we touch and the environment we are all dependent on protecting.

FOR THE

PLANET

Helly Hansen's DNA is intertwined with water. The brand was founded by a sea captain in 1877 on the Norwegian Fjords and to this day provides professional grade gear for use on water and snow around the world. Our love of water has led us to choose water as our leading sustainability effort. Apparel production uses a lot of water and is a major contributor to water pollution. This is why we will focus our research efforts, our engineering developments and consumer awareness campaigns around ensuring water around the world stays as clean as the Norwegian fjords. We are passionate supporters of many other environmental issues and will continue to be proactive participants in improving the overall standards of the Outdoor Industry but within water issues we will be thought leaders, research pioneers and drive awareness of clean water challenges to our consumers and partners across the value chain.

OUR ENVIRONMENTAL FOCUS AREAS ARE BUILT ON 3 MAIN PILLARS WHERE WE FEEL WE CAN HAVE THE BIGGEST IMPACT:

1. EFFICIENT USE OF WATER, CHEMICALS & ENERGY

- Helly Hansen has been prioritizing bluesign approved materials for over 10 years and today almost 90% of our main fabric is bluesign approved. Bluesign is an in-pur stream management system controlling that only allowed chemistry is applied, as well as it reduces water and energy consumption and air emission on production sites.
- Water consumption has always been a challenge in the textile industry. Here we have been driving change beyond regulations and certifications since the 70's by only using water-free dyeing technologies on our LIFA base layers. We are now adopting these types of technologies on a larger scale, helping us save even more water than before.

2. TRACEABILITY AND TRANSPARENCY

- We are proud of the close cooperation we have with our suppliers and nominate 100% of the materials used in our garments, down to every detail. We also have a relationship with all our material suppliers (Tier 2) which ensures traceability of all the components we are using.
- Helly Hansen has identified the focus materials and chemicals we use requiring full transparency back in the supply chain. Some of the focus materials and chemicals we use are down, wool, PVC, fluorocarbons and flame-retardant treatments.

3. CLOSED LOOP SYSTEMS

- The biggest favour we can do for the environment is to produce less stuff and instead invest in products with quality and longevity. We don't compromise on quality and want our products to be alive for as long as possible. We have stringent quality controls in the laboratory, in production and via field testing with our ambassadors ensuring products that live up to their expectations and beyond.
- Revitalization of materials and products helps us reduce our environmental impact, makes us invest in research and also help adopting existing solutions and technologies related to closed loop models and materials.

MEN'S

MEN'S WINTERSPORT

65713 ICON 4.0 SONIC WELDED STRETCH JACKET USD \$1,100

Sizes: S-2XL
Fitting: Fitted
CB/Inseam:

Insulation: Water column: Weight:

HOD

The Hod Collection is inspired by HOD, the Norse God of Winter and our love for skiing. It is experimental with trend right silhouettes, fabrics and new inspirational themes each year. This season is inspired by the 1970's, when innovative fabrics and styles revolutionized skiwear. With bright colors, high-waisted flared pants, faux leather fringes and upgrading with our modern technologies like H2Flow™, Lifa®, Lifepocket™ and LifaLoft™.

FJORD TIL FJELL

The Fjord til Fjell collection captures the essence of the Helly Hansen identity and the Norwegian outdoor lifestyle – the adventures from the fjord to the mountains! Inspired by the spectacular Norwegian nature, we have developed a collection of multi-purpose, lightweight technical gear that caters for all your adventure and travel requirements. Great looking, practical and functional – this line will work whether you set out for an adventure by the fjords, hike up to the top of the mountain or enjoy a cup of coffee in the city.

The JPN collection is inspired by Helly Hansen's long presence in Japan. The 3-in-1 Parka is both waterproof, warm, stylish and comfortable.

JPN CONNECTION

This collection is the result of an inspired collaboration between Helly Hansen Japan and Helly Hansen Norway. Focusing on the similarities of Japanese and Norwegian craftsmanship, the designs reflect the attention to details and pursuit of simplicity, elevating raw beauty and the shared passion for water and natural light.

597

349

482

Built on the idea of making garment recycling easier, this super comfortable insulator combines Urban design lines with singular material construction. The entire jacket, except the zipper, is made of polyester that can easily be recycled. Stitch free quilting, recycled light weight polyester insulation and a soft main fabric.

MONO MATERIAL

100% Recyclable

This garment is made with one single material, without any mixed fibers. Using mono material in a garment makes it easier to recycle and a better resource in a circular system, where the goal is textile to textile recycling.

HOD
The Hod Collection is inspired by HOD, the Norse God of Winter and our love for skiing. It is experimental with trend right silhouettes, fabrics and new inspirational themes each year. This season is inspired by the 1970's, when innovative fabrics and styles revolutionized skiwear. With bright colors, high-waisted flared pants, faux leather fringes and upgrading with our modern technologies like H2Flow™, Lifa®, Lifepocket™ and LifaLoft™.

HELLY TECH® PERFORMANCE

FJORD TIL FJELL

The Fjord til Fjell collection captures the essence of the Helly Hansen identity and the Norwegian outdoor lifestyle – the adventures from the fjord to the mountains! Inspired by the spectacular Norwegian nature, we have developed a collection of multi-purpose, lightweight technical gear that caters for all your adventure and travel requirements. Great looking, practical and functional – this line will work whether you set out for an adventure by the fjords, hike up to the top of the mountain or enjoy a cup of coffee in the city.

NO
CAD

990

Built on the idea of making garment recycling easier, this super comfortable insulator combines Urban design lines with singular material construction. The entire jacket, except the zipper slider, is made of polyester that can easily be recycled. Doubleweave stitch free channels with recycled light weight polyester insulation and a soft main fabric.

MONO MATERIAL

100% Recyclable

This garment is made with one single material, without any mixed fibers. Using mono material in a garment makes it easier to recycle and a better resource in a circular system, where the goal is textile to textile recycling.

HELLY HANSEN TECH CLINIC

For the past 140 years Helly Hansen has been developing & testing its technologies together with professionals living and working in some of the world's toughest environments.

Their spirit, experiences and feedback are woven into every detail and every fiber of our garments. Ski patrollers, mountain professionals, offshore sailors, search and rescue professionals all rely on our products and technologies to keep them safe, protected and warm in some of the most challenging conditions known to man.

On the following pages you can read more about the technologies used in the gear that professionals know and trust.

WARM. DRY. COMFORTABLE.

Launched in the early 1970s, Lifa® is based on a yarn technology that has been tested and developed over the years. The key functions of Lifa® deliver both moisture management and insulation, moving moisture away from the skin, while transporting perspiration to the surface of the fabric, where it evaporates. In 2006 Lifa® was combined with non mulsed Merino wool to create the best performing base layer to date.

Lifa® is a hydrophobic fiber that prohibits the absorption of liquid. The Lifa® fibers are used on the first membrane layer of base layer garments, the layer nearest to the skin. When the first yarn layer is combined with an additional layer with hydrophilic (moisture absorbing) properties, the sweat from the body is moved away from the skin and transported to the second layer, where it is absorbed. This enables the consumer to stay warm, dry and comfortable.

LIFA® is an ultra-light weight base layer fabric that works perfectly in the autumn and winter. HH LIFA® delivers light insulation and moisture management through its 100% single layer Lifa® fibers.

The Lifa® technology works best when layered under another garment, as the more garments you wear, the further the sweat and moisture will be transported out of the fabric and away from your skin.

HOW LIFA® WORKS

LIFA® stay dry technology moves sweat away from your skin, keeping you warmer for longer

LIFA® ACTIVE is our best moisture management base layer that is great for light insulation all year round. Made from a light-weight, two layer fabric that is excellent in moving moisture away from the skin; it enables the user to feel warm and comfortable.

LIFA® ACTIVE can be worn as a single layer or can be layered under another garment.

LIFA® MERINO is a unique 2-in1 base layer that combines light-weight Lifa® fibers next to skin and an extremely soft Merino Wool exterior. The Lifa® fabric moves moisture away from skin while the merino wool exterior is excellent at insulating and maintaining warmth. This is our warmest baselayer and is recommended for any type of outdoor activities in the winter.

HH MERINO

Helly Hansen launched pure merino wool base layers a few years ago, delivering great all-day warmth and comfort for cold autumn and winter days

HH MERINO LIGHT and **MID** uses high quality, comfortable Merino Wool to deliver great warmth and comfort for colder days. This is our recommended and preferred base layer for daily activities with low intensity in the winter. HH Merino Light is our year-round pure merino wool product. HH Merino Light is made with a light weight merino fabric, and it delivers light weight insulation, breathability and great comfort, all day, all year. HH Merino Mid is our mid-weight, 200g merino wool baselayer that is ideal for colder days.

lifa^{loft}
INSULATION BY **PRIMALOFT**.

- LIGHTER. WARMER.

With increased warmth, lightweight insulation and superior moisture management properties, LifaLoft™ technology is an insulation revolution that will keep you warmer with less weight and bulk compared to traditional polyester insulation. Developed in cooperation with PrimaLoft®, LifaLoft™ is a combination of Lifa®'s unique insulation structure and PrimaLoft®'s extensive knowledge in synthetic insulation.

LIFA® + PRIMALOFT® PROPERTIES:

The unique hydrophobic properties of the Lifa® fibers deliver moisture management necessary for high endurance activities, whilst the PrimaLoft® structure offers high insulation and breathable performance insulation for all active pursuits.

LIFA® DETAILS:

LifaLoft™ insulation is based on Lifa® fiber technology that is engineered into a lightweight structure that traps more air than standard polyester, providing extra warmth; the fiber does not absorb water, making the insulation technology ideal for intense activities in variable winter or summer conditions

lifa[®] + PRIMALOFT.

lifa loft
INSULATION BY PRIMALOFT.

LIGHTWEIGHT WARMTH FOR ALL SEASONS
20% LIGHTER AND STILL WARMER THAN
STANDARD INSULATION.

WARMER. COOLER. DRIER.

H²Flow™ allows you to control your body's temperature. The technology optimizes insulation, using air pockets or holes that store warmth from the body and, at the same time, allows you to control heat and airflow through ventilation zippers, enabling the cold air to enter and the warm air to exit.

Negative or positive air space is created by adding or subtracting fabric on the inside of the garment to allow this extra air space to be filled with air heated up by the body. In both cases, the purpose is to create pockets of air in strategic areas of the body, trapped in these channels or spaces. The air contained in these pockets heats up from the body heat of the wearer, and keeps you warm.

HOW H²FLOW™ WORKS

Ventilation zippers let cold air in if you get too warm. Air pockets or holes store warmth from your body, so all H²FLOW™ jackets have a high warmth to weight ratio

H²FLOW™ AIR FORCE VENTILATION

The evolution of our award-winning H2Flow™ Technology

Through the use of micro climate sensors, we have updated and improved our H2FLOW™ insulation technology by adding air force ventilation. This restructured evolution lets you control your body temperature with ease. Air is pushed through the system and forced to vent through the back panel, thus improving the exchange of warm humid air with cool dry air. The result is a warmer and more comfortable jacket.

HELLY TECH®

WATERPROOF. BREATHABLE. GUARANTEED.

Helly Tech® is constructed with Polymer Polyurethane (PU) based membranes and coating technologies. The PU membrane gives softness and stretch to the fabric, while the coating allows waterproofness and breathable qualities.

Helly Tech® is made either with Hydrophilic barrier membranes or Micro-porous membranes, depending on the end-use purpose of the fabric.

The Hydrophilic barrier works on an osmotic principle, keeping salts from entering and blocking the pores. The Micro-porous PU membranes are hydrophobic- “water hating” polymers. This membrane construction is responsible for the waterproofness of Helly Tech®, making the pores up to 20.000 times smaller than water droplets, while allowing breathability since the pores are up to 700 times larger than a water vapor molecule, allowing the evaporation of sweat and heat.

Helly Tech® is actually more than just a fabric – it is a combination of a DWR-treated outer fabric, a highly breathable and waterproof membrane, fully sealed seams and often a highly breathable inner fabric, mesh or lining.

The seams of the products are taped over with a waterproof ribbon and glue, preventing any water from entering the small gaps between the stitches of the seams.

HOW HELLY TECH® WORKS

1. DWR treated outer fabric is windproof and water-repellent
2. Waterproof and breathable membrane or coating
3. Highly breathable inner fabric, mesh or lining

THERE ARE NUMEROUS TYPES OF HELLY TECH® FABRICS. THE MAIN DIFFERENTIATOR IS THE NUMBER OF PLYS (OR LAYERS) THE FABRIC IS BUILT FROM.

HELLY TECH® PROFESSIONAL

Extremely waterproof and breathable designs and constructions. For highly aerobic, extremely wet or unusually long-lasting activities in extremely harsh conditions.

HELLY TECH® PERFORMANCE

Highly waterproof and extra breathable sport specific designs and constructions. For a wide range of high performance outdoor activities during highly challenging, changing and unpredictable weather conditions.

HELLY TECH® PROTECTION

Fully waterproof, windproof and breathable fabrics and constructions. For all situations and weather conditions where protection from the elements is needed.

3 PLYCONSTRUCTION

Outer fabric + membrane and inner fabric bonded together for lightweight, quick drying and durability.

2,5 PLYCONSTRUCTION

Outer fabric + membrane or coating bonded together with protective print on the inside for extreme lightweight and packability

2 PLYCONSTRUCTION

Outer fabric + membrane or coating bonded together for breathable waterproofness, protected by inside lining or mesh adding warmth and comfort

HELOX

Since 1949, Helox has been an important step in Helly Hansens rainwear history. The transition from oil garments to plastic started. The very successful Helox garments made from PVC was launched, giving Helly Hansen a head start on the competition due to extensive material research abroad. The Norwegian delegation all wore Helox during the 1952 Olympic Games in Helsinki.

PU REPAIR KIT

The cabin tradition of Norway means that many old garments are never thrown out, but are instead stashed away at the cabin to avoid hauling clothes back and forth. There is therefore huge potential for providing a simple yet effective product which would bring these garments back to life.

As well as being provided with each new garment, the repair kit will be sold separately encouraging consumers to repair old garments as opposed to buying new ones.

The repair kit can be attached either at the neck loop, on an outside pocket, or on the CF zip. Keeping it separate from the hangtag will draw attention to it.

PU REPAIR KIT

HH

1. CUT THE PATCH TO THE REQUIRED SIZE
2. SET IRON TO WOOL SETTING (148°C /300°F).
3. LAY THE REPAIR PATCH SHINY SIDE DOWN ONTO THE OUTSIDE OF THE DAMAGED AREA.
4. LAY A DISH CLOTH ONTOP OF THE PATCH.
5. HOLD THE IRON ON THE DISH CLOTH FOR 15 SECONDS.
6. REMOVE IRON AND DISH CLOTH. THE PATCH SHOULD HAVE FULLY ADHERED TO THE PU.
7. REPEAT THIS PROCESS FROM THE INNER SIDE TO GUARANTEE FULL WATERTIGHTNESS.

3-IN-1 SYSTEM

A combination of a light insulator jacket and a waterproof shell. Together, they are a versatile design that allows you to enjoy and adjust to all weather conditions

10-15°C

Choose the insulator for crisp and dry weather.

10-15°C

Use the waterproof shell in warm and wet weather.

-10-5°C

Combine the two for full protection in cold and wet weather.

LIFE POCKET™

LIFE POCKET™

A pocket engineered to preserve your personal electronics' battery life span. Scientifically tested and proven by engineers to extend the battery life of your mobile phone or action camera in cold environments. Through thermal resistant materials and an innovative construction, the Life Pocket™ stays 2 times warmer than a regular ski jacket pocket.

LIFE POCKET +™

A pocket engineered to preserve your personal electronics' battery life span. Scientifically tested and proven by engineers to extend the battery life of your mobile phone or action camera in cold environments. Through the use of one of the best insulation materials available, PrimaLoft® Gold Insulation Aerogel, and an innovative construction, the Life Pocket™ stays 3 times warmer than a regular ski jacket pocket.

HELLY HANSEN TECH PARTNERS

Lavalan is designed as a natural, environmentally friendly alternative to the synthetic wadding normally used inside quilted garments.

The world's best down alternative.

PrimaLoft® is a synthetic insulation technology, offering superior thermal properties with excellent water repellency. It is made up of ultra-fine fibers that form air pockets to trap heat inside. Additional feature of the ultra-fine fiber is super softness.

ALLIED

Advanced down technologies.

Natural goose down is considered to be the single best insulating material available, due to its lightweight, compressibility and heat retention. Allied Down supplies its customers with the finest quality down and feathers on the market.

Little parts, big difference.

High quality zippers for all purposes. YKK® is a Japanese company founded in 1934. Today, their products are sold globally and YKK® is reputed as the industry leader for quality and innovative zippers and closure.

Soft. Light: Surprisingly strong.
A high-tech, lightweight and super soft fabric which dries x8 quicker than cotton.

The cornerstone of thermal insulating materials. We work extensively with Polartec®, a famous manufacturer of lightweight and warm fleece, which is known for performance, durability and aesthetics. Main benefits for using Polartec® are warmth without high additional weight, high breathability, packable and fast drying.

Elemental protection.
Dry, comfortable and lightweight construction. The benchmark for durable yet lightweight fabrics throughout the outdoor industry.

Recco® Technology makes you searchable for organized rescue in the event of an avalanche accident. The system requires no training and no batteries to function, meaning it is always "on" and ready. RECCO® reflectors do not prevent avalanches nor do they guarantee location or survival in the event of a burial.

THE BRAND

Founded in Norway in 1877, Helly Hansen continues to develop professional-grade apparel that helps people stay and feel alive. Through insights drawn from living and working in the world's harshest environments, the company has developed a long list of first-to-market innovations, including the first supple waterproof fabrics almost 140 years ago. Helly Hansen is a leader in technical sailing, performance ski and premium workwear apparel.
