Torrentshell 3L Jackets

Simple and unpretentious, our Torrentshell 3L Jacket provides long-term comfort and protection in soaking storms and steady drizzles. We named it 3L for its 3-layer shell, which consists of recycled nylon face fabric with a DWR (durable water repellent) finish, an engineered polyurethane membrane and a tricot backer that work together to meet our rigorous H₂No® Performance Standard. Fair Trade Certified™ sewn. Imported.

Embroidering waterproof garments can cause them to leak. To ensure they remain waterproof after embroidering, we will only ship to Patagonia-approved decorators. Please call us for a list of companies that can both decorate and seam-seal your garments

Get the Most Out of Your Gear

A look back at seven years of Worn Wear and why we think the best jacket for our planet already exists.

Worn Wear was born in 2013 from the realization that, no matter how environmentally responsibly we build our products, nothing can beat keeping gear in play as long as possible. Clothing is not usually the first thing that comes to mind when we think about waste, but in 2017, landfills received 11.2 million tons of textiles, not to mention the energy footprint required to create new stuff to replace the old. Keeping gear in use for just nine additional months can reduce a product's waste, water and CO₂ footprint by 20% to 30% compared to buying a new garment.

Repair is a radical act because it directly opposes the linear economy's dependence on disposable products. We've been repairing gear since our very beginnings. In 2017, we took things a step further when we began buying back customer's used gear in exchange for up to \$100 in credit, then cleaning the items and selling them on WornWear.com.

Overall, Worn Wear promotes a circular economy: keep an object in use for as long as you can, get the most value out of it, then recover and repurpose the material at the "end" of its life. We believe in this so strongly that we have teams

cruising around the world in a fleet of mobile repair shops with the mission of fixing your stuff. In the fall of 2019, we opened a Worn Wear® pop-up store in Boulder, Colorado, selling used and ReCrafted Patagonia clothing and hosting workshops dedicated to helping customers extend the life of their gear.

In addition to reducing harm to our planet, hanging on to well-used gear is a way to celebrate our experiences. Folks say that clothes tend to jog their memories about good times they've had while wearing them. There's the twinkle-eyed joy of passing them on to the next generation. They are, after all, the stories we wear.

**We're in business to
save our home planet.**

In Business for Good

B Corp: Harnessing the Power of Business

Society's most challenging problems cannot be solved by government and nonprofits alone. The B Corp community works toward reduced inequality, lower levels of poverty, a healthier environment, stronger communities and the creation of more high-quality jobs with dignity and purpose. By harnessing the power of business, B Corps use profits and growth as a means to a greater end: positive impact for their employees, communities and the environment. *Find out more at bcorporation.net.*

1% for the Planet®: Smart Environmental Giving

1% for the Planet® is a global movement inspiring businesses and individuals to support environmental solutions through annual memberships and everyday actions. It advises on giving strategies, certifies donations and amplifies the impact of its network. Since its inception in 2002, members have donated some \$225 million to nonprofit environmental groups. *Learn more at onepercentfortheplanet.org.*

Nets to Lids

Fishing nets are among the most harmful forms of plastic pollution. So for the last five years, we've been supporting another California-based company, Bureo, in the development of the NetPlus™ material used for the brim stiffeners in our hats.

Fully traceable and 100% recycled, NetPlus is made from commercial fishing nets that would otherwise be discarded. The first step in the process is purchasing the damaged nets from fishing communities in South America, which helps supplement the incomes of local fishermen when they're not at sea.

Next, the nets are cleaned, shredded and recycled into the durable, moldable material that's now being used in skateboard decks, surfboard fins, sunglass frames, office chairs and more. The first NetPlus formulations we tried for hat brims came out too stiff, but after a few rounds of development—and repurposing the originals into wax combs and bike tire levers—we landed on an ideal balance of stiffness and flex.

This season, we're switching all our brims to NetPlus. By doing so, we're repurposing 71,000 pounds of waste this year alone—the equivalent of 35 pickup trucks full of the discarded nets that are littering beaches, harming marine life and breaking down into the food chain all over the world.

Branding Guidelines

Approved Branding

Removable Logos

- Removable Zipper Pulls - woven loops
- Removable Woven Hem Labels
- Branded and Reusable Packaging
- Recycled Cloth Totes
- Reusable Luggage Tags
- Recycled Hang Tags – QR codes with message, donation voucher cards
- Companion Gifts – water bottles, reusable food containers and utensils, etc.

Non- Approved Branding

Permanently Attached Logos

- Embroidery
- Screen Print
- Dye Sublimation
- Non-woven Zipper Pulls
- Iron-on-patches
- Any Chest Logos

Removable Woven Zipper Pulls

Beyond the Office, Out of the Landfill

Patagonia has transitioned away from allowing permanently attached additional logos to our products, and we want to be clear about why.

Recyclable Woven Zipper Pull

Custom zipper pulls add a recyclable and fully removable branding element

Recyclable Woven Zipper Pull

Custom zipper pulls add a recyclable and fully removable branding element

Recyclable Woven Zipper Pull

Custom zipper pulls add a recyclable and fully removable branding element

Removable Woven Labels

Each day at Patagonia, we look for ways to use our business to save our home planet. As a clothier, that starts with creating goods that last—if not forever, then for a really, really long time. Using a garment for just over two additional years, for example, cuts its overall footprint by 82 percent, and we build our gear to be used for decades.

Recyclable Woven Label

Custom woven labels can be easily removed from garments without damaging the fabric
