The Sunice story.

1976

The origins of Sunice came with a collaboration between a police and firefighter uniform manufacturer, and an outdoor clothing designer. The resulting outdoor wear featured the best of both worlds — robust, protective, functional and stylish.

Just six years later, Sunice is selected to outfit the team for Canada's first Mount Everest expedition. On the flanks of the world's highest peak, choosing the right gear is life or death.

1982

1988

The accolades continue and Sunice is selected as the Official Outerwear Supplier for the 1988 Winter Olympics in Calgary, Alberta. Welcome to the mainstream.

Sunice launches its first golf collection when our skiwear designers apply their performance outerwear mindset to golf — a game they love. The same “best-of-both-worlds” approach, that ignited Sunice 15 years earlier, brings the game-changing benefits of new fabrics and layering to golfers everywhere.

1992

2010

Sunice is tapped once again as Official Supplier to the Winter Olympics Games. This time to keep hundreds of the world's attending media dry and warm in Vancouver's renowned tempestuous weather.

Sunice is a sponsor of 24H Tremblant, an event where skiers ski night and day over a 24-hour period. Another perfect and very demanding proving ground for our high-performance ski wear.

2010-15

2015

Sunice is acknowledged as the #1 outerwear for pros on the PGA tour*. More golf professionals wear Sunice outerwear than any other brand. And this is by choice, not endorsement dollars. Being the go-to outerwear for the greatest golfers on earth makes us proud.

*Source: Darrell Survey. Based on pro golfers reporting which brand of outerwear tops they were carrying at PGA Tour tournaments (excluding majors and WGC events) in the 2015 season. Sample size: 1,440 surveys.

TODAY

Each and every piece of Sunice apparel is designed and manufactured with very specific construction and insulation requirements. Everything we have learned about warmth, comfort and freedom of movement goes into every product we make. Consequently, we deliver apparel that will keep skiers protected from the elements — even on the coldest of January chairlift rides.

Warmth to the nth degree.

The logo consists of a stylized circular emblem with three vertical bars inside, resembling a tennis racket head.

sunice

A high-angle photograph of a snowy mountain slope. The snow is bright white and shows several tracks from skiers or snowboarders. On the left and right sides, there are evergreen trees heavily laden with snow. The overall scene is bright and wintry.

WARM UP.

AND DOWN.

MEN'S SKI

MEN'S ELEVATION COLLECTION

Designed and developed to be the finest skiwear on the mountain, the Sunice Elevation Collection combines premium and innovative fabrics with accomplished patterns and exceptional workmanship. These technical jackets and pants will satisfy even the most discerning of skiers.

MEN'S & WOMEN'S SOCIETY

MEN'S SOCIETY COLLECTION

Citizens of Metropolises situated in the northern latitudes have embraced the modern winter city coat in great numbers. Consequently, there is much selection available. The difference in the Sunice Society Collection is the application of our technical expertise in fabric, insulation and construction combined with exclusive luxurious details. The Sunice Society coats feel as light and comfortable as a performance ski jacket while being exceptionally warm in all weather condition.

Sunice performance technology.

FABRICS

All Sunice jackets and pants display the best stretch performance fabrics in the market. Some are best suited to the extreme 4-way stretch with enhance Lycra and others are uniquely designed with 2-way stretch comfort. All stretch fabrics are laminated with very soft and breathable films.

DuPont™ Sorona® renewably sourced fiber*

The newest technology in yarn since Tactel, Sorona® 4-way stretch is a unique and special yarn which has just come on the market with special properties that allow for a deeper saturation of color with better lightfastness, and a overall softer hand feel.

The soft-shell classic: two textile surfaces are bonded with a highly breathable coating in a special process. The coating in the middle ensures additional protection from wind and water.

Tecnostretch® from Italy offers luxury stretch fleece back fabric to keep you super warm with tremendous comfort.

TecnoWool from Italy combines the finest Merino wool together with a mix of fibers blended to achieve a high performance sweater knit with a soft fleece backing.

SPORT//ACTIVE

This new fabric is 89% Polyester / 11% Elastic and is extremely cozy and warm due to the brushed velour backing. It also features fast drying wicking properties.

INSULATIONS

Considered to be the warmest insulator in the world; it's truly nature's best.

Primaloft® Silver Down Blend

is known as the highest performing down insulation; Primaloft® Down Blend has the unique quality to keep you warm even when wet! Compared to natural down, Primaloft® Down Blend combines water repellent treated duck down with ultra-fine Primaloft® microfiber "puffs"; which retain 90% CLO value when wet and dries four times faster than natural down.

Primaloft® is the world's best down alternative and is considered the warmest synthetic insulation. The belief that "comfort is freedom" has driven Primaloft® innovation and technology.

The original warmth-without-bulk insulation. 3M™ Thinsulate™ Insulation is the trusted brand for warmth because it traps and holds body heat while allowing moisture to escape.

3M™ Thinsulate™ Featherless Insulation is designed to closely mimic the look and performance of natural down - but with two times the loft when wet and without the allergens.

ClimaLoft™ Insulation contains ultra-fine polyester fibers that trap and hold the body's natural heat. Unlike many fibers, ClimaLoft™ also stays warm even when it's wet.

COATING

Sunice applies WxTech™, a proprietary finish to all our jackets and pants. WxTech™ has a unique formula that allows air to flow freely through the fibers while maintaining maximum breathability of the garment and the ability to repel water. WxTech™ reduces the effects of “wet out”, causing water to bead off the surface of the fabric.

FURS

Sunice uses only SAGA Furs® which originate exclusively from strictly regulated European farms, with the highest quality standards and regulations.

TRIMS

Sealon® adhesive films and technology provide ideal solutions for high quality decorative color trim without seams and permanent bonding features.
